Vector Pipeline
Chicago To St. Clair Mi.

To: Mr. Hunter Shively
From: Doyle BAUGHMAN

Spread I: Sheehan P.L. Contractors

Road boring crew is working just south of the H.W. 6 crossing.

I spent time visiting with the road boring inspector Bill Wiese about progress, for the week & to date. They are two weeks behind their projected schedule completion, mostly due to rain. They are working extra hours, and Sundays to make up some of the delays.

The spread has 99 miles of R.O.W. from Joliet station to the Michigan line.

The clearing and grade crew is at state H.W. 35 north of LaPort Indiana.

That leaves them about 22 miles from the end at Mi. line. The main welding crew is about 60% complete. They are doing close to 1/4 miles per-day.

They still appear to be on their mid Oct. completion schedule.
